

FlySentry™

A REFILLABLE FLY BAIT STATION

NEW!

THE FLY BAIT STATION YOU'VE
BEEN LOOKING FOR IS

HERE!

FEED LOTS

Modern fly bait has been around for years, but there has never been an ideal way to house the bait. Until now.

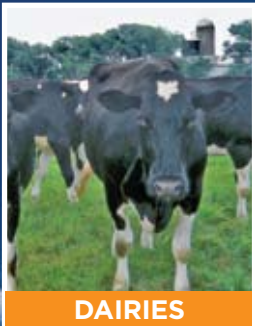

Introducing FlySentry™—a rugged, refillable fly bait station that maximizes bait effectiveness while protecting the bait from the elements.

Designed by pest control professionals, FlySentry fly bait stations maximize the effectiveness of proven fly baits and eliminate local fly populations.

FlySentry's unique hooded design exposes flies to your choice of bait while shielding it from wind, rain and the UV rays that cause bait to breakdown and lose potency.

Rugged and tamper-resistant, FlySentry fly bait stations eliminate the need for broadcast bait spreading and keep bait away from children, pets and other animals.

FlySentry stations are perfect for use in or around all potential fly habitats, including feed lots, dairies, swine pens, and poultry lots.

DAIRIES
